# JAD FARHAT

Montréal, QC | jadk.farhat@gmail.com
github.com/j4dgpt | linkedin.com/in/jafarhat

Software engineer focused on Python backends, AI-powered workflows, and full-stack applications. Delivered internal reporting automation at Xsolla and built independent products with API design, authentication, data integrity safeguards, and automated testing.

## TECHNICAL SKILLS

Languages & frameworks: Python, TypeScript, JavaScript, Java, SQL, FastAPI, Flask, React, REST APIs
Data & AI: PostgreSQL, SQLModel, SQLAlchemy, RAG, embeddings, ChromaDB, Ollama, Claude APIs, Whisper
Tools & practices: Git/GitHub, Docker, Google Cloud Run, pytest, Alembic, CI/build validation

## ENGINEERING EXPERIENCE

### Xsolla | Software / AI Engineer Intern | Remote | Aug - Nov 2026

- Built AI-powered Loom digests summarizing shipped work, blockers, and next steps, delivered through Slack to mentors and interns.
- Implemented Friday missing-report alerts, streak tracking, and conservative identity matching to reduce incorrect notifications.
- Extended internal programme-lead reporting with cohort submission status and blocker context; validated changes with 63 targeted tests, a 2,882-test suite, and TypeScript/build checks.

## SELECTED SOFTWARE PROJECTS

### Clypio | Creator Campaign & Verification Platform | Python, FastAPI, PostgreSQL

- Built a creator-campaign backend with 20 relational tables and role-based workflows for creators, brands, and administrators.
- Implemented authorization, server-authoritative engagement counts, and append-only audit logs; verified core business flows with 240+ automated tests.

### RAG Document Assistant | Python, FastAPI, ChromaDB, Ollama

- Built document question-answering across five file formats using chunked ingestion, embeddings, vector retrieval, and local LLM inference.
- Exposed a shared retrieval pipeline through REST API, CLI, and Gradio interfaces with streaming responses.

### MeetingMind | AI Meeting Assistant | React, Electron, Whisper, Claude

- Developed a desktop meeting assistant that transforms recordings into searchable transcripts, summaries, action items, and follow-up drafts.

### AI Voice Companion | Python, Flask, Whisper, Claude, ElevenLabs

- Integrated transcription, LLM responses, and speech synthesis; added validation, bounded state, logging, and health checks across five API endpoints.

## ADDITIONAL PROFESSIONAL EXPERIENCE

### Marcus Evans Group | Account Executive | Jun 2025 - Apr 2026

Led executive discovery conversations, qualified business needs, and translated stakeholder requirements into tailored proposals.

### Transat Inc. | Tour Operator | Sep 2023 - Apr 2025

Coordinated 500+ monthly travel packages and resolved time-sensitive operational issues across suppliers and customers.

## EDUCATION

Concordia University | B.Eng. Software Engineering | Expected Apr 2027
